

Our neoprene tank jackets provide a flexible solution to help protect filter vessels across a wide range of applications. Designed to assist with shielding tanks from environmental wear and tear, they offer a neat, professional finish while also supporting insulation and impact protection.

FEATURES & BENEFITS

- **Weather-Resistant Outer Layer:** Neoprene exterior helps protect against UV, dust, and light moisture.
- **Impact & Abrasion Guard:** Adds a protective layer against knocks, movement, and general handling.
- **Smooth Inner Lining:** Allows for easy installation and removal without scratching the tank surface.
- **Lightweight & Flexible:** Easy to handle and fits snugly.
- **Thermal Buffer:** Helps reduce sudden temperature changes caused by direct sunlight or exposure.
- **Standard Fit Design:** Tailored for common tank sizes used in filtration systems.

Size (Diameter x Height)	Fit Compatibility	Colour	Closure
8" x 44"	Standard 8" FRP vessels	Black	Zipper with Velcro fastening
